Purpose

These guidelines are underpinned by those developed by the Council of Australian University Librarians (CAUL), and they provide a basis for the establishment and provision of library services made available to Partner Provider teaching staff and students enrolled at the University Partner Provider campuses/sites.

In addition to the CAUL Principles, Federation University Australia's Library Guidelines are also underpinned by relevant clauses contained within our teaching delivery contracts with our Partner Providers.

Through a unique funding arrangement, Partner Providers agree to the provision of a physical library service/space for University enrolled students at their Institutes. Federation University Library, in conjunction with staff employed in this space, provides supplementary access to its collections, resources and staff to ensure that the Partner Library and its staff are able to support research and program needs of University enrolled students and Partner Provider staff teaching those students.
